CAREER SUMMARY:

Motivated and solution-oriented Flutter Developer with 1.2 years of hands-on experience in building responsive, user-friendly, and cross-platform mobile applications for Android and iOS. Skilled in Flutter UI design, RESTful API integration, Firebase services (Authentication, Firestore, Realtime Database, and Cloud Messaging), Supabase connectivity, Bloc state management, MVC architecture, MySQL database handling, and package integration to enhance application functionality. Possess foundational knowledge in Node.js and .NET Core for backend debugging, issue resolution, and API handling. Experienced in FastReport and RDLC report designing, Git and GitHub version control, SQL query writing, and collaborative development workflows. Strong in problem-solving, communication, and team collaboration, with a continuous passion for learning modern technologies and delivering innovative solutions in fast-paced development environments.

SKILLS:

- UI Design: Building responsive and user-friendly mobile interfaces
- Flutter Development: Cross-platform mobile application development for Android and iOS
- API Integration: Connecting apps with RESTful APIs and third-party services
- Firebase: Authentication, Firestore, Realtime Database, and Cloud Messaging integration
- Supabase: Database connectivity, authentication, and backend service integration
- Package Integration: Efficiently using and managing Flutter packages to enhance app functionality
- State Management: Bloc (Business Logic Component) for scalable app architecture
- Architecture Patterns: MVC (Model-View-Controller) for clean and maintainable code
- Database Management: MySQL and SQL query writing for mobile applications
- Report Designing: FastReport and RDLC report designing for dynamic and interactive reports
- .NET Core: Basic debugging, issue solving, and backend troubleshooting
- Git & GitHub: Version control, code collaboration, and repository management
- Research & Innovation: Continuously exploring and implementing modern development techniques and tools

WORK EXPERIENCE:

Kaizen Star Technologies LLC

Flutter Developer | 10 February, 2025 – Present

- Delivered responsive technical support, improving app stability and increasing user satisfaction for Flutter-based applications.
- Developed and maintained detailed documentation for Flutter app features, API usage, and UI components.
- Increased team productivity by streamlining bug tracking, feature planning, and version control using modern development tools.
- Actively collaborated with designers, backend developers, and project managers to enhance existing Flutter apps and build new, user-focused features.

Luminar Technolab

Flutter developer Intern | 12 June, 2024 – 30 November, 2024

- Developed and maintained mobile apps using Flutter for real-world client projects.
- Supported app troubleshooting, bug fixing, and feature testing.
- Participated in app design, development, and deployment processes.
- Collected project requirements and conducted research to improve development.

RELEVANT PROJECTS:

Event Management App (Full Stack Project)

Personal Project | Full-Stack Flutter Application | 5 February ,2026 – 14 February,2026

- Developed a full-stack Event Management application using Flutter, Node.js, and MySQL.
- Designed a role-based system with separate privileges for admin and users.
- Implemented RESTful APIs using Node.js for handling core functionalities.
- Integrated authentication using token-based security for secure access control.
- Connected and managed data using a MySQL database.
- Built a responsive and user-friendly UI for both admin and user panels.
- Implemented image upload functionality on the backend using Node.js.

Todo App (Full-Stack Mobile Application)

Personal Project | Full-Stack Flutter Application | 20 October ,2025 – 21 October,2025

- Developed a full-stack mobile Todo application using Flutter with clean architecture and BLoC state management.
- Implemented Firebase Authentication (Google Sign-In and Email/Password) for secure user access.
- Built real-time CRUD functionalities (create, update, delete, mark complete) using Firebase backend integration.
- Designed a modern, responsive mobile UI for smooth performance across different devices.
- Integrated Supabase for database connectivity and task management as an alternative backend solution.
- Enabled seamless task operations with structured data handling and efficient API interaction.
- Maintained a modular and scalable architecture ensuring clear data flow and maintainability.

Consent form Application

Kaizen Stars Technologies | 16 September, 2025 – 17 November, 2025

- Developed a Flutter tablet app for patient document signing and digital declarations.
- Integrated signature capture, secure data handling, and user-friendly forms to improve patient intake processes.
- Focused on responsive tablet design and smooth user experience for hospital/clinic use.

Appointment Viewer Application

Kaizen Stars Technologies | 13 March, 2025 – 14 May, 2025

- Built a Flutter membership app with subscription management and therapist appointment booking features.
- Enabled users to schedule therapy sessions and receive real-time appointment status updates.
- Designed a custom checkout flow for easy digital product purchases and membership upgrades.

Call Patient App

Kaizen Stars Technologies | 13 March, 2025 – 14 April, 2025

- Developed a Call Patient app integrated with hospital management software for seamless communication.
- Implemented a one-click call feature that automatically fetches the patient's number into the dial pad.
- Utilized FCM tokens to enable secure and instant patient data retrieval from the software.
- Ensured smooth integration between the mobile app and existing backend systems for real-time calling functionality.

EDUCATION:

2021 – 2024 | Mahatma Gandhi University

KMM College Of Arts And Science Thrikkakkara – Bachelor of Science in Computer Science
